## Our Values and Beliefs

All staff and students strive to create a safe and welcoming environment in our learning spaces, hallways, washrooms, playgrounds, and school buses. These shared values of kindness, respect, and empathy provide a framework for our interactions with students and each other.

As a team of learners, we believe that positive, respectful relationships with our students and families are essential. A safe learning environment that allows students to be heard and to have choice leads to student success.

We feel that instruction should be differentiated and based in best practice. Teachers are the facilitators of learning, and collaboration between all members of the school community is key to ensuring students receive the best care.

# Our School

Rosser school is a Kindergarten to Grade 4 school with a current enrolment of 56 students. With 4 professional staff and 5 support staff, we provide quality public education to all students in a safe, positive, and respectful setting. Our staff strive every day to meet the needs of all members of our school community.

# Our Goals

2022-2023 goals were centred around 2 focus areas: Numeracy and Literacy

Numeracy - building awareness for our students and parents of the connection between numeracy and the greater community; encouraging a growth mindset and belief that we are all "Math people."

Literacy - implementation of a school-wide structured literacy program and early intervention to support our students who struggle with independent reading and/or are reading below expectations.

# Our Progress

## Literacy -

We purchased a new decodable text reading program for both in-class and take-home reading practice.

Our Kindergarten-Grade 2 staff participated in literacy focused PD opportunities through the ISD continuous improvement plan learning network.

Weekly emails to families with information and strategies to try at home.

## Numeracy

We used our "November Numbers" initiative to encourage our students and families to be talking, thinking, and participating in numeracy rich tasks. The activities consisted of a daily math problem, weekly "learn and then teach" card games for students to show families, and a school-wide Numbers Games Afternoon.

# Our Thanks

We would like to thank our entire school community for their support during the 2022-2023 school year. With your support, we were proud to offer our students an excellent academic program in addition to valuable extra-curricular experiences.

We are excited for the upcoming school year. As we look forward to next September, our school goals will focus on literacy, numeracy, and well-being.

Take care and have a safe and enjoyable summer!
